Cryolipolysis Treatment

WGT-312

ONE WEEK

\$2,495

Cryolipolysis is a method in which fat cells are tackled by means of a cold treatment. It is a safe and reliable method which requires neither an operation nor anaesthetic. We're all familiar with cold treatments, such as an ice pack for strained muscles and joints. Coolsculpting works on the basis of Cryolipolysis, using controlled freezing to cool fat cells until they crystallise. The body then gradually disposes of the fat cells in a natural manner.
